

{basename}.h5 — spectHR export structure

- File root
- Epoch group
- Required sub-group
- Optional sub-group (needs rsp / bp channel)
- Band sub-group (×N per configured band)
- @ attribute (scalar)
- [] dataset (float64 array)

* resp_freqs present only for adaptive-band profiles
[N_f] = PSD frequency bins · [N_w] = profile windows
[N_b] = in-band frequency bins · [N_br] = breath cycles
